**'Maximising growth in the whole child – academically, socially and emotionally'**

### PRINCIPAL'S REPORT CHRIS MALONE

#### **Whooping Cough**

We have now had more than one confirmed case of whooping cough at school.

To prevent further spread of pertussis (whooping cough), please:

- Isolate symptomatic children
- Go to the doctor if your child is symptomatic
- Report to Sale Primary School if you/your child has been formally diagnosed with whooping cough, and
- Follow isolation/school exclusion guidelines as per your GP/school

At the end of this Newsline is a fact sheet from Gippsland Region Public Health Unit. This information is also available on our Compass App.

#### **School Saver Bonus**

This term, families with a child enrolled in a government school from Prep to Year 12 in 2025 will receive the one-off \$400 School Saving Bonus. The \$400 School Saving Bonus provides families with support for education-related costs, such as school activities and/or school uniforms and textbooks.

The School Saving Bonus is not available for full-fee international students, home schooled students, TAFE students and students attending kindergarten in 2025.

#### **Actions for parents and carers**

## ART ROOM NEWS

### LOU COOPER

### ART TEACHER

Foundation students have created a collaborative mural. Using pieces of material scraps and wool, they practised their cutting skills to create a self portrait. Their finished piece is hanging on the wall opposite the first aid room, near the staff room.

Senior students have been looking at the artist Barbara Kobylnska. Barbara sculpts huge birds using lots of different materials. Seniors are creating their own mixed media bottle birds. Firstly, Seniors drew a sketch of their bird. Then they created the armature using foil, masking tape and Modoc based from an old plastic bottle. The final step will be to paint and decorate their birds. It is fabulous seeing the different birds the students are creating, they are having a lot of fun with this unit.

A group of children and an adult are sitting in a circle on a wooden floor, playing drums. One child in the foreground is wearing a red shirt and a headband. An adult in a blue patterned shirt is sitting on a stool, also playing a drum. There are other children in the background, some wearing headbands. The room has wood-paneled walls and a large window.

# Learning in MO

In MO this week we have been focussing on poems. We have explored many different poems and investigated the symbolism and themes evident. Students brainstormed what a friendship feels, looks and sounds like and used this as a guide to write a poem on friendship.

Students completed journal entries 'seeing the significance' of symbolism in poems.

Students then created their own poems on friendship using their brainstorm and implemented language features.

# MAYPOLE SPINNING WHEEL

Our Garden Party Maypole Celebration is fast approaching. One of the big interest items on the night is always the spinning wheel.

This year we are asking for donations from families towards one of the four baskets/themes:

**\*Sport & Outdoors**

**\*BBQ & Gourmet Food**

**\*Games**

**\*Pampering**

If you are able to donate an item to one of these themes, please pass it onto to child's teacher who will ensure it gets wrapped up in the prize baskets.

Thankyou in advance for your support!

## Celebrating and Raising Awareness to Phelan-McDermid Syndrome

Today is a special day for our class member, Lizzy.

On the 22nd October, JA celebrated and brought awareness to Phelan-McDermid Syndrome.

Please see the next pages for information about Phelan-McDermid Syndrome and our class member Lizzy.

Throughout the day we learnt about Phelan-McDermid Syndrome, decorated our classroom, wore stickers and many other surprises in the colour green to show our support.

We feel very lucky to share this special day with Lizzy and her family!

## Things to know about Phelan-McDermid syndrome

Phelan-McDermid Syndrome Foundation (PMSF)

### What is Phelan-McDermid syndrome?

Phelan-McDermid syndrome is a rare genetic disorder involving chromosome 22 that can affect many critical functions in a person's body — from learning and communicating to eating and sleeping.

This results in intellectual and physical disabilities that vary from person to person. Some people with Phelan-McDermid syndrome lose essential skills, and most require long-term care and medical attention.

### Common symptoms:

- Low muscle tone
- Delay in reaching milestones such as sitting, walking, and rolling over
- Intellectual disability
- Delayed or absent speech
- Difficulty making eye contact
- Repetitive/obsessive behaviors and limited interests

ADDITIONAL MEDICAL SYMPTOMS MAY APPEAR LATER. THEY MAY ALSO ONLY APPEAR IN A SUBSET OF PEOPLE. LEARN MORE AT PMSF.ORG.

### How rare is Phelan-McDermid syndrome?

Phelan-McDermid syndrome is estimated to impact 1 in 10,000 births. The PMSF has the largest community of diagnosed individuals, with 3,465 members worldwide.

The estimated prevalence suggests this number should be much higher, highlighting the challenges of rare disease diagnosis and support!

### What treatments are available?

Currently, there are no approved treatments for Phelan-McDermid syndrome's root cause.

Care focuses on managing symptoms and risks, often with a team of specialists.

Therapy is common, and clinical trials for new treatments are increasing.

### PMSF is here to help.

The Phelan-McDermid Syndrome Foundation's mission is to make today better and the future brighter for everyone living with Phelan-McDermid syndrome — from the moment of diagnosis to the delivery of treatments and cures.

#### HERE'S HOW WE DO IT:

- Supporting and connecting families
- Improving medical care
- Driving research breakthroughs

Lizzy Mole

### Lizzy's life.

When Lizzy was born, she was regular baby size and was born at the right time. But over a few weeks, we noticed that she wasn't doing the same things as other babies the same age. When she was 10 weeks old, doctors did lots of tests. Eventually they found that she has a little bit of her DNA missing. DNA is what we are all made of, and they usually have the exact same number of pieces. Because of the spot where Lizzy's piece was missing is the same as some other peoples, we were able to call it Phelan-McDermid Syndrome. Only 2600 people in the world are known to have the same condition as Lizzy. It is known as a rare disease.

Now we could contact other people across the world and found lots in Australia to help each other. We use the four-leaf clover as a symbol and say Lizzy is Phelan Lucky.

All the people and their families chose October 22nd to be the day we celebrate and bring awareness to Phelan-McDermid Syndrome.

Everyone who meets Lizzy helps her every day. All of you in her class have been wonderful and brilliant friends. Thank you for welcoming Lizzy and celebrating today with her.

# School Saving Bonus

## Information for government school parents and carers

### About the School Saving Bonus

The Victorian Government is making life that little bit easier for families by providing a one-off \$400 School Saving Bonus.

This support will help cover the cost of school uniforms, textbooks, and school activities like camps, excursions and sports.

The School Saving Bonus is in addition to existing and continuing means-tested supports for Camps, Sports and Excursions Fund (CSEF) and the Affordable School Uniforms Program.

The School Saving Bonus will be provided to schools and families in Term 4, 2024.

### Who receives the School Saving Bonus

The School Saving Bonus is available for parents and carers of all Victorian government school students from Prep to Year 12 in 2025, except for full-fee international students, home schooled students, TAFE students and students attending kindergarten in 2025.

### Actions for parents and carers

Parents and carers of children who meet the School Saving Bonus eligibility above are required to do the following by **Friday 18 October 2024**:

- **Complete enrolment**

If your child, or children are changing government school for Term 1 2025, or starting Prep or Year 7 in 2025, please complete enrolment. For more information, read about [Enrolling in School](#).

- **Check your contact information**

Ensure your contact information is up to date with your school. You can check this information by contacting your school directly.

### Accessing the \$400 School Saving Bonus

You do not need to apply for the School Saving Bonus.

The Department of Education will email you in November 2024 with your \$400 School Saving Bonus. You will be able to access it via an online system.

You can decide how to best use the School Saving Bonus for your family's needs. You can choose how to allocate the \$400 in the online system.

The bonus can be used towards 2025 school costs, which may include:

- camps, trips, excursions and incursions
- swimming and sporting programs
- outdoor education programs
- graduations
- school uniforms
- textbooks.

The bonus can be used at your school's approved textbook or uniform suppliers either in-store or online, or through State Schools' Relief. The list of suppliers may include a school uniform or bookshop. Any amount that you choose to allocate to textbooks and uniforms will be valid until 30 June 2025. It will then transfer to your child's school account for future activities.

Funds will roll over for use in future years if it is not all spent in 2025.

### Families with more than one eligible child

Families who have more than one child at the same school can combine their School Saving Bonus payments to use on one child, or for a specific activity. So, for example, a family with 3 children who are all government school students would receive support to the value of \$1,200 and choose how they spend those funds. The School Saving Bonus cannot be combined across different schools.

### More information

To learn more about the School Saving Bonus visit [vic.gov.au/school-saving-bonus](https://vic.gov.au/school-saving-bonus). Translated information will also be available on the School Saving Bonus website in the next few weeks.

## Pertussis (Whooping Cough) Frequently Asked Questions

*(Primary School and Children's Services)*

### WHAT IS WHOOPING COUGH?

Whooping cough is a highly contagious respiratory disease caused by the bacteria *Bordetella pertussis*. It is characterised by severe coughing fits that produce a "whooping" sound.

### HOW IS IT SPREAD?

Whooping cough spreads through droplets from coughing or sneezing from an infected person. It can also spread by coming into contact with surfaces contaminated with these droplets.

### WHY SHOULD I BE WORRIED?

Pertussis can affect people of all ages. However, young infants (especially those less than 6 months of age) are at increased risk of severe complications, including pneumonia, seizures, and even death. Being highly contagious, schools or groups of young children, who often cough & sneeze, can facilitate mass outbreaks – impacting children, and their direct and indirect contacts.

### WHAT CAN I DO ABOUT IT?

**Vaccination** is the most effective prevention method.

Free pertussis-containing vaccination is available for eligible people through the [National Immunisation Program](#) schedule, which include:

- infants at 2 (can be given from 6 weeks of age), 4 and 6 months of age
- children at 18 months and 4 years of age
- adolescents in Year 7 (or age equivalent)
- pregnant women in every pregnancy between 20 to 32 weeks gestation
- people under 20 years who did not receive pertussis-containing vaccination in childhood, where the vaccine was not given during childhood as [catch-up vaccination](#)
- refugees and humanitarian entrants aged 20 and over.

An adult pertussis-containing vaccine is also recommended for the following people if their last dose was more than 10 years ago:

- adults working with or caring for children, especially healthcare and childcare workers in contact with infants.
- women who recently gave birth and did not receive a pertussis-containing vaccine during pregnancy
- parents, guardians, or carers of infants aged less than 6 months
- adults 65 years of age and older as a single booster
- travellers.

Practising good hygiene and appropriate isolation measures from infected individuals also helps reduce the risk.

For information regarding childhood vaccination, please refer to the state-wide [Maternal & Child Health Helpline - 13 22 29](#) (24 hours a day, 7 days a week).

To book a vaccination appointment, please refer to the [CIRV Vaccine Portal](#). For Latrobe City, please contact the Latrobe City Council's Immunisation Team on 1300 367 700.

#### WHAT IF A CHILD IS UNWELL?

Pertussis begins with symptoms similar to those of a cold (e.g., cough, tiredness, blocked or runny nose, low-grade fevers which may last for one to two weeks), with the cough usually worsening to include:

- Severe bouts of coughing
- Characteristic 'whooping' sound on breathing
- Vomiting at the end of a bout of coughing

**If your child becomes symptomatic, please visit your GP for testing and advice on antibiotic treatment.**

For a listing of Priority Primary Care Clinics and telehealth services specifically for the Gippsland region, refer to the [Gippsland Primary Health Network - After-hours Services](#).

#### CAN A CHILD GO TO SCHOOL/CHILDCARE?

##### **For symptomatic children:**

- Any symptomatic children must isolate and seek medical attention.
- Children diagnosed with whooping cough must **not** attend school for:
  - a. 21 days after the onset of cough, or
  - b. Until they have completed 5 days of a course of appropriate antibiotic treatment.

*This exclusion is required by law under the Public Health and Wellbeing legislation.*

##### **School exclusion requirements for close contacts not showing infectious symptoms:**

	RECEIVED THREE DOSES OF PERTUSSIS VACCINE	NOT RECEIVED THREE DOSES OF PERTUSSIS VACCINE
AGE: Less than 7 years	Can continue to go to school/childcare	If in the same room with a child diagnosed with whooping cough, will need to be <b><u>excluded</u></b> from school/childcare for: <ol style="list-style-type: none"><li>a. 14 days after the last exposure to the infectious case</li><li>b. Or until they have taken the first 5 days of a course of effective antibiotic treatment</li></ol> <p><i>This exclusion is required by law under the Public Health and Wellbeing legislation.</i></p>
AGE: 7 years and older	Can continue to go to school	Can continue to go to school
